(Sorry if you received this twice!!)

Hi all - we had a beautiful day as 24 of us drove through Half Moon WMA in search of birds! We had special permission to drive in as a group. Thank you to Candi Wallace who led the way, and to my co-leader Bob Cole! Also a big thank you to Tom Russano and Mark Cudney for setting up their scopes and helping everyone see the birds! As a group we saw or heard 53 different species! Two Bachmann's Sparrows came out to sign to us and give us some good looks. We also saw Swallows-tailed Kites, heard Northern Bobwhite and Red-headed Woodpeckers. There were so many vireos of every kind as well. We also saw deer, cattle, and a raccoon.
